Preschool Adventure

Adventures are waiting!

Topi, the hedgehog, Alma the squirrel and their friends are having a great time in a fun story written by prize-winning Siri Kolu. With all characters a child will learn a lot about feelings, friendship, nature and other important topics. Get along!

Learning material for pre-primary education containing modules for mother tongue, mathematics, environmental education, emotional skills, physical education, media education, expression and presentation skills, music, crafts as well as social skills.

Preschool Adventure and the new curriculum

- Integrative materials for pre-primary lessons include language, environment, maths, PE, social skills and media studies.
- Includes all core content areas in the new curriculum and broad-based skills.
- The main focus is on learning-to-learn, functionality and inclusivity.

Teacher's Material

Before starting to work on the Child's Book, children practice various skills related to the subject area at hand by playing, doing and experimenting. The Teacher's Material contains a multitude of games and activities for each subject area (e.g. water on page 40 in the Child's Book). The Teacher's Digital Material also offers a lot of exercises that can be used when either introducing a topic or revising after children have studied and practiced a topic thoroughly. The Digital Material is a link between the two- and three-dimensional worlds.

TEXTBOOK AUTHORS: KATI LASSILA, VIRPI MARTTILA, MINNA SALMINEN

STORY BY: SIRI KOLU

ILLUSTRATIONS BY: JOHANNA LUMME, HELI PUKKI

Components:

- Child's Book
- Pen Adventure and Holiday Booklet
- Teacher's Material
- Digital Teacher's Material
- Large illustrations for classroom use taken from the Child's Book
- Songs CD
- Puppets

Start with songs, play and games, then open the Preschool Adventure book!

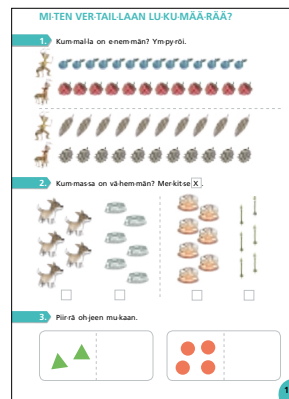

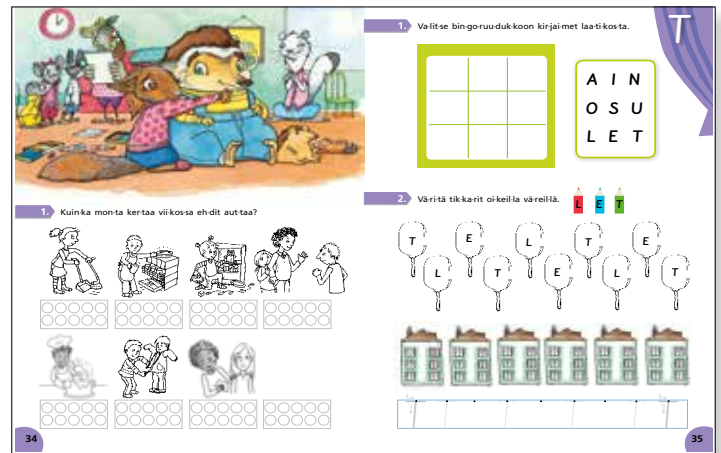

Child's Book

Preschool Adventure is an integrative and diverse learning material for pre-primary education. The Child's Book is a reversible workbook: from one side you enter the world of stories and when you turn the book the other way around, you have the material for developing math skills.

First half of the book, the world of stories, contains eight units which portray a fictional preschool called the Wild Fig and the goings-on of its children. Three of the units are intended for the autumn term and five for the spring term.

Each unit starts with a spread illustration (exist also as large pictures for classroom use). Children can practice interpreting the illustration by means of various exercises found both in the Child's Book and the Teacher's Material. There is also a short text intended for children who already know how to read. These are followed by multidisciplinary modules which are laid out in the National Core Curriculum (e.g. I study and practice, Me and my community, I grow and develop). The book guides children into discussing, playing and studying together. For learning each letter of the alphabet there is a whole page of activities. Careful instructions for going through the letters and modules can be found in the Teacher's Material.

On the reverse side of the book are the math pages that make a coherent whole. The math exercises are based on short stories (featured in the Teacher's Material and recorded in the Digital Material) about adventurous ants who marvel at the world. They face many everyday problems and it is through these that children can practice problem-solving skills while acquainting themselves with various fields of mathematics.

Pen Adventure and Holiday Booklet is an additional material for the use of children. It contains exercises with which they can strengthen their fine motor skills and perception. The exercises in the booklet can also be used as a tool for differentiation for either strengthening a child's 'pen skills' or as extra material for those who are quick to finish.

The holiday part of the booklet covers the main holidays of the preschool year. Each holiday is presented by a coloring picture and an activity. Stories connected to the holidays and suggestions for celebrating them as well as other activities can be found in the Teacher's Material.

Otava Publishing Company
Uudenmaankatu 10
FI-00120 Helsinki, Finland
www.otava.fi

Otava Publishing Company Ltd is a major Finnish publishing house with a history that stretches back over 120 years. Otava publishes both printed and digital educational materials for a wide range of subjects and for all levels of education. Today's educational material is based on the concepts of blended learning and multichannel publishing. These materials have been one of the reasons behind the Finnish PISA success.
